

COVID-19 Vaccine Information
02/03/2021

Many residents have asked where you get the COVID-19 vaccine. Below is information that we have received as possible places that you can try to at least get on a waiting list for the vaccine.

You first should check with you healthcare provider--many of which are asking you check your "My Chart" online for available information. If you are unable to access your "My Chart" then call your local health care provider and speak to them.

Green Lake County Health Department-You may call them and if you are eligible they will put you on a waiting list. Currently they are receiving very few doses compared to what they are requesting. Their phone number is 920-294-4070. Once you are on the list there is no need to call back as they will contact you when it's your turn.

Ripon Drug-They are also making a waiting list for those that are eligible as well. Their phone number is 920-354-8465. Once they have you on their list there is no need to call back as they will contact you when it's your turn.

Bentley Pharmacy Princeton-They are beginning to take names for a waiting list as well for those that are eligible. Their number is 920-295-6271; once they have you on their list there is no need to call back as they will contact you when it's your turn.

To help from slowing down the process for these places that are already working extremely hard to get the vaccine out as quick as possible, it is recommended that you call the location that is closest to you and put your name on that list and not call all locations. This will streamline the process and not clog up the system with a bunch of names that already have received it elsewhere.
